Left click "Next" which results in the following screen:

Setup Wizard

Bambu Network plug-in

Bambu Network plug-in provides the following features:

- Sending print job via WLAN or cloud service
- Full remote control
- Liveview streaming and printer status monitor
- Cloud synchronization for slicing configuration

☒ Install Bambu Network plug-in

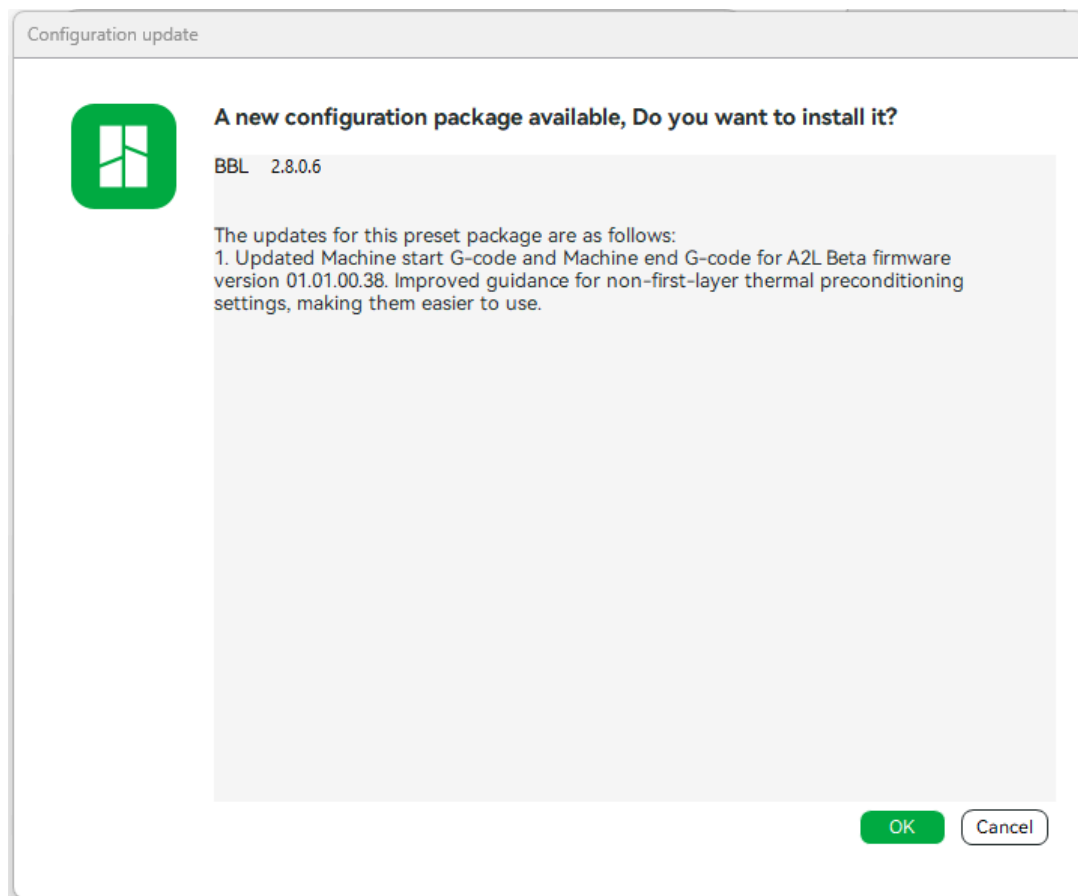

Back

Finish

left click on Finish. Which results in the following screen:

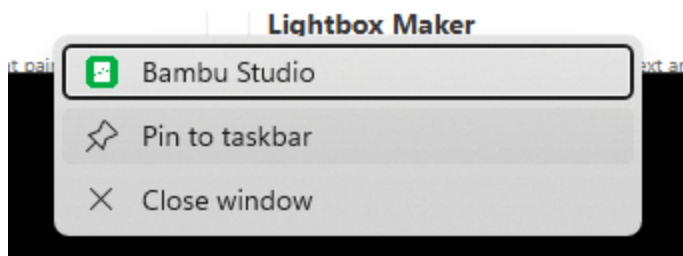

A screen which I failed to copy will show up which they need to left click allow for the network access. My guess is on this step and maybe others we will need to go around and do this as admins.

This screen will pop up:

They should left click "OK"

have them right click the Bambu icon below resulting in:

They should left click "Pin to taskbar"
