

Ahead in the Books and a Head in the Clouds

Jeremy James is a **Pilot** for Republic Airways, headquartered in Indianapolis, Indiana. Working as a First Officer, he flies Embraer E-Jets, safely transporting passengers on short hops. Jeremy shares, “I get to **travel** and see different places, constantly working with **new and different people**. My favorite part of the job is **flying the airplane** of course!” He also notes how rewarding it is to “connect family members to their loved ones during the holidays and help business travelers make it to their meetings.”

“Skills such as **teamwork** and **communication** have been very helpful in my career,” says Jeremy. Noting how he coordinates with co-pilots in the cockpit, Jeremy reflects that he developed these skills by taking leadership roles in high school. An **accelerated science** course followed by his **senior project** – he explained the process of landing an airplane to a panel of judges – propelled his decision to pursue aviation. These experiences taught Jeremy that “your group will perform based on how well you can divide the task up and make sure everyone is on the same page. If you are great at communicating or enjoy **problem-solving**, you’d love this as a career!”

For students considering a job in aviation, Jeremy recommends, “**stay focused** and keep your head in the books.” Jeremy says the bottom line is that being a pilot is “definitely not your typical 9-to-5 job. No one flight is ever the same. And the views from the airplane are incredible!”

Jeremy's Journey

Jeremy James
Airplane Pilot

“I feel my work has contributed to **making the world a better place**. I am responsible for the transportation and safety of many people daily.”
